

The Snowbird Mode Checklist

Your house spends six months without you. Stick this on the fridge: one side for spring, one side for fall.

Before You Fly North

APRIL – MAY

- ☐ Test your alarm with the monitoring center
- ☐ Update emergency contacts and your keyholder
- ☐ Create separate codes for house-watcher, pool & lawn service
- ☐ Walk every camera view in the app: front, driveway, gates, lanai, pool
- ☐ Clean camera lenses & trim plants blocking views
- ☐ Place flood sensors by water heater, AC, washer & sinks
- ☐ Set temperature alerts
- ☐ Set lights on varied schedules, not the same time nightly
- ☐ Stop mail & deliveries, or have someone collect them
- ☐ Bring in or tie down patio furniture before hurricane season
- ☐ Arm in Away mode and confirm it on your phone

When You Fly Home

OCTOBER – NOVEMBER

- ☐ Check the app for alerts or events from while you were away
- ☐ Walk the outside: screens, gates, roof edges, camera mounts
- ☐ Wipe camera lenses (salt air, pollen & black snow add up)
- ☐ Replace any low sensor batteries the app flagged
- ☐ Remove temporary codes you no longer need
- ☐ Test your alarm with the monitoring center again
- ☐ Check camera recording dates: does footage go back far enough?
- ☐ Note any blind spots and call us to cover them
- ☐ Ask your insurance agent about a monitored-alarm discount

My house-watcher:

Alarm company account #:

Remember: an alarm tells you THAT something happened. A camera tells you WHAT happened. Snowbird Mode puts both in one app.
